Automatic can testers

PRE GLX LEAK-TESTERS

Food – General Line

TYPE OF TEST: VACUUM (PRESSURE ON REQUEST)

Product range	1012	1018	1024	1512	2016	2024	2032	2048
can diameter (mm)	52 - 125	52 - 125	52 - 99	120 - 260	200 - 305	74 - 200	99 - 165	52 - 99
can height (mm)	40 - 280	40 - 280	40 - 280	120 - 400	150 - 500	50 - 350	40 - 280	40 - 140
max output (cpm)	120	220	300	30	30	100	250	650
number of heads	12	18	24	12	16	24	32	48

can conveyor	<i>lateral execution only</i>
level of work	<i>mm 1000 adjustable</i>
sense of rotation	<i>counter clockwise (on request it can be opposite)</i>
height changeover	<i>electrical device with display; required time 1 minute</i>

MAIN FEATURES

These models are realized especially for industrial cans, as a result of the excellent experience that we have acquired with the PRE on the division of food cans. These machines are realized in several versions able to satisfy the major part of needs of Canmakers to test all types of cans, round or shaped, 2 or 3 pieces, tin plate, aluminium or composite, open top or with different closures.

All these machines are equipped with the special **can lifting device GLX**

This system allows to lift the cans in a perfectly vertical way as far as they reach the rubber heads and to keep them in position during the entire duration of the test. In this way the cans are positioned without the necessity of a containment tool under the rotating table and so this feature allows a quick can size change

IMPROVEMENTS OF THE GLX SYSTEM

- Perfectly vertical lifting of the cans that allows to simplify the tester's tool
- Very precise positioning of the cans on the testing heads that avoids every risk to do wrong tests.
- Constant support of the cans during the entire test cycle, very useful in the case of big cans.
- Minor wear of the rubber disks of the testing heads, due to the better positioning of the cans that avoids accidental kerfs or other damages.
- Machine tooling simplified that allows a very quick can size changeover
- Possibility to test all types of shaped cans and cans with POE
